Information about Copyrighted Content

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR spot-masked the following variables in the data: **Q21_VERB, Q31, Q63_T_VERB, Q83_T_VERB,** and **Q202_VERB.** The following geographic variables were masked: **GMSANAME, GZIPCODE,** and **GZIPSTATE.** The open-ended numeric age variables, **AGE** and **Q195,** were top-coded at 72 and 1946 - respectively.

2. **Variable Discrepancies**:

   a. In the P.I. Codebook for TransPop Data, the variables **Q21_VERB** and **Q86_VERB** are named **Q21** and **Q86** – respectively.

   b. The variable **GD7** does not appear in the P.I. Codebook for TransPop Data, no additional information was provided.

3. **Variable Recodes**: The variables **Q205, Q205_I,** and **Q38** were top-coded to match the P.I.'s value labels.

4. **Qualitative Data File:** The variable **Q21_VERB** was exported to a comma delimited (CSV) file which is available for download and can be linked to the dataset via the **STUDYID** variable.

5. **Additional Information:** For additional information on the TransPop Study, please visit the TransPop website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
